Dear Sirs,
Please reject NAB's petition 04-160! I love my satellite radio, and as it is a service that is paid for, the NAB should have no say over the content of it.

The traffic and weather reports for the various cities is very important to my business as well. My husband and I are truck drivers, and it is very helpful to know what the traffic is like in a city we are heading into, and where there may be problems. It takes too long to find a local station to give us this information, plus it is nice to know of problems several hours in advance, which you can't do with a local station. Having the traffic and weather information anytime is very helpful when planning the best route around a city!

Thank you for your time.

Sincerely yours,

Susan Henriques
